DETAILED ACTION

Allowable Subject Matter

1. Claims 1-36 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1:

In their remarks filed March 20th, 2008, Applicant makes several arguments as to why this claim is patentable over Hamada et al. Not all of these arguments are persuasive. In particular, since Hamada discloses that there is some phase error in the clock, Hamada does disclose a reproduction signal that is data sampled by a not-yet-synchronized clock. Any clock with a phase error is not-yet-synchronized.

However, in Hamada, although the reference value of the cross detector is updated, it is not updated based on a phase error amount where the phase error amount results from the frequency error between the synchronous clock and the not-yet-synchronized clock. Instead, the reference value of the cross detector is updated based upon the overall level of the reproduction signal.

Therefore these limitations in combination with the other limitations of the claim render it allowable over the prior art of record.

Regarding claims 2-36:

They are allowable due to their dependence on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
